

OBJAŠNJENJA DOKUMENTACIJE ZA NADMETANJE/CLARIFICATION OF THE TENDER DOCUMENTATION

Postupak nabave za osobe koje nisu Obveznici Zakona o javnoj nabavi (NOJN) /Tender Procedure for non-purchasing organizations (NPOs)

Evidencijski broj nabave/Procurement ref. No: 19-2020

Datum/Date: 13.10.2020

NARUČITELJ/BIDDER: BIFIX d.o.o. Buje, Digitronska 10, Buje, OIB: 05392930222

PREDMET NABAVE/SUBJECT OF PROCUREMENT: Nabava dvopužnog ekstrudera za proizvodnu liniju za bijeli Masterbatch/Procurement of Twin-Screw Extruder for Production Line for White Masterbatch

KONTAKT/CONTACT: Petra Meglič, +385 91 5243 850, bini@bifix.hr

Sukladno točki 1.2. DZN-a, Naručitelj je zaprimio sljedeće pravovremene zahtjeve za pojašnjenjima, te na njih dostavlja odgovore kako slijedi/In accordance with Chapter 1.2. of the Tender Documentation, the Contracting Authority has received timely requests for clarification of tender documentation, as provided below, and is therefore providing its clarifications as follows:

Datum upita/ Date of Request for Clarification	Upit /Request for Clarification	Pojašnjenje/Clarification
09.10.2020.	Molimo Vas pojašnjenje Priloga 7, tehničke specifikacije a vezano uz sljedeću rečenicu: „Kapacitet do 700 kg/h za formulacije 20% LDPE + 80% praškaste tvari navedenih fizičkih osobina: BET>3,5 m2/gr i nasipna gustoća <0,200 kg/dm3”. Navedena formulacija ne odgovara definiciji „bijeli Masterbatch” jer je komunicirana nasipna gustoća preniska. Iz navedenog razloga, lijepo molimo 1. naznačite koja se vrsta praškastih tvari dodaje LDPE-u i u kojem postotku (npr. CaCO3 20%, TiO2 60%), 2. potvrdite minimalne vrijednosti nasipne gustoće za sve materijale u	1. Nažalost, traženo se odnosi na Bifixov „know-how” te isto nismo u mogućnosti iznijeti javno. 2. Potvrđujemo nasipnu gustoću polimera: 0,500-0,600 g/cm3, te za praškaste tvari < 200 kg/dm3. 3. Nasipna gustoća finalnog proizvoda > 0,500 g/cm3. 4. Traženi je kapacitet <u>do</u> 700 kg/h.

Oct. 9, 2020	formulaciji, 3. potvrdite nasipnu gustoću finalnog proizvoda, 4. posljedično, potvrdite minimalno zahtjevan kapacitet. We would like to ask you a clarification on annex no. 7, technical specifications. Regarding the following sentence: “Capacity up to 700 kg/h for formulation 20% LDPE + 80% of powder raw materials, physical properties: BET>3,5 m²/gr and bulk density <0,200 kg/dm³”. The formulation listed does not correspond to the definition of “white masterbatch” because the bulk density communicated is too much low. For this reason, we kindly ask you to: 1. Indicate which kind of powder are added to LDPE and in which percentage (e.g. CaCO₃ 20%, TiO₂ 60%); 2. Confirm the <u>minimum</u> bulk density value for each material in the formulation; 3. Confirm bulk density of the final product; 4. Consequently, confirm the <u>minimum</u> required capacity.	1. Unfortunately, this is Bifix's <i>know-how</i> so we cannot disclose this kind of information publicly. 2. We can confirm the bulk density of Polymer: 0,500-0,600 g/cm³, and for Powder < 200 kg/dm³. 3. The bulk density of the final product > 0,500 g/cm³. 4. The required capacity is <u>up to</u> 700 kg/h.
