The selection criterion for subject matter of procurement shall be the best value for money.

The received tenders will be evaluated on the basis of a non-price and price criterion whose relative importance and maximum number of points per criterion are described in the table below.

No.	Criterion	Relative importance	Maximum No of points
Price criterion			
1.	Tender price	50%	50
Non-price criterion			
2.	Maintenance price	30%	30
3.	Response time to service intervention	20%	20
IN TOTAL:		100%	100

5.2.1. Non-price criterion

Points for non-price criteria will be awarded according to the following table:

No.	Criterion	Relative importance	Maximum No of points
1.	Maintenance price	30%	30
The maximum number of points (30) will be			

The project "Strengthening the competitiveness of ESCO - FOFONJKA by investing in digital and green transition" is financed by instrument for Recovery for Cohesion and European Areas "REACT-EU"

awarded to the tender with the lowest price of three-year maintenance, while other tenders will be awarded points according to the following formula:

$$O = \text{On} / \text{Op} * 30$$

O – the number of points that the tender received for the tenderer price of three-year maintenance (rounded to the nearest whole number in such a way that if the decimal part is less than 0.5 it is rounded down, and if it is equal to or greater than 0.5 it is rounded up)

On – the lowest price tender for three-year maintenance

Op – the tender price for the three-year maintenance that is the subject of the evaluation

30 – maximum number of points

2. Response time to service intervention	20%	20
---	------------	-----------

The maximum number of points that can be achieved for response time to service intervention is 20 points.

The tender response time to the service intervention is determined in Annex I - Tender submission form, which is an integral part of the tender.

< 1 day - 20 points

1 day - 2 days - 15 points

3 days - 4 days - 10 points

5 days - 6 days - 5 points

≥ 7 days - 0 points

For the purposes of evaluating tenders according to the non-price criterion, the tenderer is obliged to deliver:

- **The maintenance price** should be expressed for a period of three (3) years from commissioning. The maintenance price must include all necessary changes that affect

the operation of the tendered machine, troubleshooting, and the correction of possible errors, preventive maintenance and all other related costs.

- To prove the calculation of the three-year annual maintenance price, the Tenderer is obliged to enclose an offer and/or general conditions and/or a proposal for a maintenance contract and/or a document in which the requested service is evident.

Note: Maintenance costs are not included in the tender price since the same is not required in Annex III - Cost estimate and Annex IV – Technical specification. This criterion serves exclusively to determine the quality of the offer, and as a basis for possible future contracts.

- **Response time to service intervention** is scored in accordance with the table above, and the Tenderer must provide a minimum of three (3) ways to provide customer support:

1. By e-mail
2. By phone/cell phone
3. In person (arrival of service technician)

After the Contracting entity determines the point value for each individual tenderer according to the individual non-price criteria from the table above, the points awarded to them according to each of the criteria will be added up to obtain the total number of points for each tenderer.

5.2.2. Non-price criterion

The maximum number of points (50) will be awarded to the tender with the lowest price while the rest will be awarded in accordance with the following formula:

$$C = C_n / C_p * 50$$

C - the number of points that the tender received for the offered price (rounded to the nearest whole number in such a way that if the decimal part is less than 0.5 it is rounded down, and if it is equal to or greater than 0.5 is rounded up)

C_n - the lowest price offered in the procurement process

C_p - the price of the tender that is the subject of evaluation

50 - maximum number of points for the price criterion

After the Contracting entity determines the point value for each individual tender according to the price criterion, the points earned will be added to the points earned on the basis of nonprice criteria in order to obtain the total number of points for each individual tender.

6. Tender review and evaluation

The project "Strengthening the competitiveness of ESCO - FOFONJKA by investing in digital and green transition" is financed by instrument for Recovery for Cohesion and European Areas "REACT-EU"

The tender review and evaluation shall be performed by the Procurement Committee after the expiry of the tender submission deadline.

During the tender review and evaluation the Contracting entity may invite the tenderers to submit clarifications or amendments regarding the evidence as required in item 3 and item 4 hereof, in order to eliminate errors, omissions or ambiguities which can be eliminated.

The tender list, cost estimate and guarantee for the seriousness of the tender (if applicable) are not considered certain documents that are missing in terms of Article 293 of the ZJN 2016 and the Contracting entity may not ask the tenderer to submit them during the evaluation of tenders.

The Contracting entity shall invite the tenderers within a reasonable period, which shall not be less than five (5) nor more than fifteen (15) days, to clarify or amend the evidence submitted pursuant to item 3 and 4 hereof and shall not consider such clarifications or amendments modifications to the tender.

The Contracting entity may invite the tenderers within a reasonable period, which shall not be less than five (5) nor more than ten (10) days, to clarify certain elements of the tender in the part related to the tendered subject-matter of procurement. The clarification shall not result in modification to the tender.

Requesting clarifications or amendments shall not have the effect of discrimination, unequal treatment of the tenderers or of favoring a particular tenderer or economic operator.

The Contracting entity shall reject the following tenders based on the tender review and evaluation:

- Incomplete tenders (does not contain all Call for Tender issued mandatory elements);
- Tenders not complying with the provisions of the tender documentation;

The project "Strengthening the competitiveness of ESCO - FOFONJKA by investing in digital and green transition" is financed by instrument for Recovery for Cohesion and European Areas "REACT-EU"

- Alternative tenders;

After the tender review and evaluation, valid tenders shall be ranked according to the selection criterion. In case two (2) or more valid tenders are equally ranked according to the selection criterion, the Contracting entity shall select the tender which has been received earlier.

The tender complying with all conditions and with the lowest price shall be considered the best tender.

7. Decision on the selection

Based on the results of the tender review and evaluation, as well as on the tender selection criterion, the Contracting entity shall reach a Decision on the selection of the most favorable tender for the subject-matter of procurement or of the tenderer with whom to enter into the public procurement contract respectively.

The Decision on the selection shall at least contain:

The period for reaching the Decision on the selection shall be thirty (30) days from the expiration of the tender submission deadline. The Contracting entity reserves the right to extend the period for reaching the Decision on the selection due to possible requests from the Contracting entity to clarify or supplement the tender documentation, accept the correction of calculation error, explain the extremely low tender price, submit updated documents (if applicable) or other circumstances that may affect the deadline for the Decision on the selection.

After ranking the tenders according to the selection criterion and before reaching the Decision on the selection, the Contracting entity may invite the most favorable tenderer with whom they intend to enter into the procurement contract, to submit originals or certified copies of one or more documents required herein. If the tenderer has already submitted originals or certified copies of such documents, they shall not resubmit them.

Originals or certified copies of the documents submitted for the purpose of verifying the tenderer may not correspond to the previously submitted uncertified copies of the documents, for example in terms of date of issue or validity, but they must serve as evidence that the tenderer still complies with the requirements the Contracting entity has set out herein.
